

Tridium is excited to provide Niagara Hidden Gems, a collection of smaller features with each release which provides specific ongoing value for Niagara stations, applications, services and/or end-users.

Upgrade to Niagara 4.13 now to take advantage of these features!

VISUALIZATION / USER EXPERIENCE

HTML5 Tag Manager View Enhancements

- The view saves state, maintaining the selections of the filter field and the direct and implied checkboxes, enabling faster workflow
- Additional hover text/tooltip displays the implied tags provided by a tag group

Group Hosts in The Nav Tree

- Organize the nav tree with a folder structure to group common Niagara instances

Support “nspace” Convention in Alarm Hyperlink Ords

- When using the alarm console, a hyperlink is provided to direct a user to the alarm source. By enabling the nspace convention, this allows support to better leverage virtuals and on-demand pxViews, especially in a multi-tiered environment

DEPLOYMENT

Preserving **Handle Ord** When Installing or Upgrading Templates

- Component and application templates will preserve their handle ords upon install or upgrade, enabling extended station and template configurations.

Group Templates in The Template Sidebar

- Organize the template sidebar with a folder structure to group or version control templates

CERTIFICATIONS & COMPLIANCE

Obix History Compliance

- Provides the ability to exclude history records in response to a client request by leveraging the hidden flag
